Ms. Julie Sears
Region X
U. S. EPA Library
1200 6th Avenue
Seattle, WA 98101

Dear Ms. Sears:

We understand that EPA is making significant progress on its field investigation team (FIT) reports concerning assessment of potential Superfund sites. These studies are using the ERRIS list as a starting point for site selection. Since Monsanto Company has sites included in the master list, we are interested in determining the status of EPA's program, especially as it relates to Monsanto sites.

Specifically, we would like EPA to provide us any information from the FIT program pertaining to Monsanto locations within your region including:

- Has a FIT study been planned and/or completed.
- Has a field inspection been planned or completed.
- Copies of FIT reports containing information on Monsanto locations where studies or inspections are complete.

If you wish to discuss this letter before replying, please contact me at 314-694-8882. I thank you in advance for your cooperation.

Sincerely

Michael A. Pierle
